MEMORANDUM TO: Joseph Donoghue, Chief
Licensing Branch 3
Division of New Reactor Licensing
Office of New Reactors

FROM: Adrian Muñiz, Project Manager **/RA/**
Licensing Branch 3
Division of New Reactor Licensing
Office of New Reactors

SUBJECT: SUMMARY OF TELECONFERENCE TO DISCUSS OPEN ITEMS
ASSOCIATED WITH THE REVIEW OF THE ADVANCED BOILING
WATER REACTOR CERTIFICATION RENEWAL

On October 27, 2016, the U.S. Nuclear Regulatory Commission's staff held a teleconference with members of GE Hitachi Nuclear Energy (GEH) to discuss responses to requests for additional information and letters addressing open items associated with the review of the advanced boiling-water reactor certification renewal. Specifically, the following topics were discussed:

1. Hurricanes Winds and Missiles – The staff asked GEH to address the velocities in the vertical direction and indicate whether the entire height of the structures are protected from all missiles or only up to 33 feet.
2. Multiple Spurious Operations (MSO) – The staff sought clarification on several items discussed in Subsection 9.5.1.1.7 as described below:
 - a. Describe remote multiplexing units and de-multiplexer.
 - b. Sentence that reads “The probability of two identical spurious signals matching, induced by physical damage (including fire damage) to the fiber-optic transmission cables is, miniscule,” seems to be mixing probabilistic language with a deterministic fire protection program.
 - c. Discuss whether digitized control signals must match at the de-multiplexer in order for control action to take place.

CONTACT: Adrian Muñiz, NRO/DNRL/LB3
(301)415-4093

J. Donoghue

-2-

- d. Staff indicated that statement that reads in part, "Damage to the fiber optic transmission cable" implies that the concern is limited to fiber optic cables creating an MSO.
- e. Clarify statement "Spurious operation of equipment controlled by Remote Multiplexing Units (RMU) in the field due to physical damage because of fire or smoke will be considered in cases where the connection between the RMU and the field devices is transmitting a command signal."

GEH committed to submit revisions to their letters associated with the items above to address staff's questions, as appropriate. The list of participants for the meeting is enclosed.

Docket No.: 52-045

Enclosure:
As stated

cc w/encl.: See next page
