Prior to removing a location of use authorized by the license, the licensee must provide evidence that no residual contamination is present at the locations requested for removal. Please provide recent leak tests for the gauges that were stored or used at the locations requested: Dist. 3, 122 State Place, Rutland, Vermont, and 235 Joshua Place, Rutland, Vermont. Alternately, you may provide a statement that only sealed sources were used at those locations, leak tests were performed at the required frequency, and the results of leak tests were negative for contamination.
