RE: Docket Number 71-0946, Termination of WPI's QA Program

We wish to terminate WPI's Quality Assurance (QA) Program, approved by the NRC on August 19, 2009, which was associated with the decommissioning of our nuclear reactor. WPI's plutonium starter source was removed by the DOE on 12-7-2009, our uranium fuel was shipped by the DOE to UMass Lowell on 7-28-2011, and our R61 reactor license was terminated by the NRC on November 25, 2014. We will no longer be shipping, receiving, or possessing radioactive fuel.

Thank you for your attention to this matter.
