Power Reactors in Extended Shutdowns: Petition for Rulemaking (PRM); Notice of Docketing and Request for Comment; Part 50 of Title 10 of the Code of Federal Regulations (PRM-50-114; NRC-2016-0204)

On December 9, 2016, the NRC published a notice of docketing in the *Federal Register* ([81 FR 89011](#)) for a PRM dated September 1, 2016, from David Lochbaum on behalf of the Union of Concerned Scientists and two co-petitioners (the petitioners). The petitioners request that the NRC “promulgate regulations applicable to nuclear power reactors with operating licenses issued by the NRC but in an extended outage.” The PRM was docketed by the NRC on September 14, 2016, and has been assigned Docket Number PRM-50-114. The NRC is examining the issues raised in PRM-50-114 to determine whether they should be considered in rulemaking. Comments on PRM 50-114 are due by February 22, 2017.
