LISLE, IL 60532-4352

January 10, 2017

Mr. Joseph Smetanka, Managing Director
Hematite Decommissioning Project
Westinghouse Electric Company
3300 State Road P
Festus, MO 63028

SUBJECT: WESTINGHOUSE ELECTRIC COMPANY, LLC MASTER INSPECTION PLAN
CALENDAR YEAR 2017

Dear Mr. Smetanka:

In accordance with U.S. Nuclear Regulatory Commission (NRC) Inspection Manual Chapter 2602, "Decommissioning Oversight and Inspection Program for Fuel Cycle Facilities and Materials Licensees," the NRC Region III staff and management have developed a Master Inspection Plan (MIP) for the Westinghouse Electric Company, LLC (Hematite or licensee). The plan is based on your previous and current performance and schedule of activities planned for the site for January through December 2017. The plan outlines how we intend to focus our Regional inspection resources for Hematite.

We currently project the region will conduct 1 to 2 site inspections at Hematite through December 2017 to evaluate decommissioning activities. The specific procedures that may be used during these inspections are listed below. Additional inspection procedures may be used or additional inspections conducted if decommissioning activities warrant. The NRC may also be using Oak Ridge Associated Universities (ORAU) to support NRC's review of your decommissioning activities.

<u>Inspection Procedure</u>	<u>Title</u>
IP 88045	Environmental Protection
IP 83890	Closeout Inspection and Survey
IP 83822	Radiation Protection
IP 92702	Followup on Traditional Enforcement Including Violations
IP 87104	Decommissioning Inspection Procedure for Materials Licensees

The NRC reserves the right to add any inspection procedure or perform additional site inspections to ensure compliance with NRC regulations and public health and safety.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

J. Smetanka
