Subject: [External_Sender] New Reg for nuclear reactors
Date: Monday, May 23, 2016 8:37:16 PM

Please distinguish the difference between a nuclear fission reactor and a nuclear fusion process ... now the public and nuclear regulatory agencies do a very poor job of separating the concerns and processes ... lumping all as "nuclear" when the processes have dramatically different concerns, processes and out comes!!!

How about calling a spade a spade ... using the terms "fission reactors or process" and "fusion facilities or process" ... or something like that.

There needs to be this separation from the highest levels!! ... as fusion is taking a bad rap!
