Lisle, IL 60532-4352

Reason: Response to phone conversation with Frank Tran

Good Morning Frank

In regard to the phone conversation we had this morning the please see the following answers to your questions:

- 1) Assistant Radiation Safety Officer – All ARSO's will undergo the same safety training as radiographers as well as ARSO and Source Retrieval Training.
- 2) 880 Elite – Please correct the reference on our license to 880 Delta Elite to read 880 Elite.
- 3) Leak Test – the RSO, a trained Radiographer, or ARSO will conduct leak test of our exposure devices. The leak tests will be sent to a third party approved vender for analysis. The results will be logged and recorded in the rig book to meet NRC compliance.
- 4) The DU request remains the same for shielding purposes.

Thank you for your help and understanding in this matter. Please do not hesitate to contact me should you have any questions or concerns.

William D Reeve
NDT Manager, RSO, and Trustworthy & Reliable official
of the NDT Division of Niowave Inc.
