SUBJECT: Yale-New Haven Hospital Requests a License Amendment to its
Possession Limits for Iodine-131 from 1 Curie to 2 Curies

Gentlemen and women of the NRC,

Yale-New Haven Hospital (YNHH) would like to amend NRC license 06-00819-03 to increase the possession limits for Iodine-131 from the current limit in Condition A of the license that allows possession of any byproduct materials with atomic numbers 1 through 83 and a half-life less than 120 days. Instead of modifying Condition A, we would like to request an additional Condition adding Iodine-131 in any form, not to exceed 2 Curies.

We are requesting this amendment in order to participate in two research trials involving therapeutic administrations of I-131 that might cause scheduling issues with servicing patients who normally receive therapeutic Iodine-131 for thyroid conditions.
