Dear Dr. Cataldo:

Enclosed is Amendment No.13 to your NRC Material License No. 21-32342-01. Please note that License Condition No. 13 referencing the transportation requirement in Title10 of the *Code of Federal Regulations* (CFR), Part 71, "Packaging and Transportation of Radioactive Materials," and License Condition No. 14 referencing financial assurance have been deleted in accordance with current NRC policy. The transportation regulation is now included in the preamble on page 1 of the license, as well as the financial assurance regulation in 10 CFR Part 30. We have also added NRC's Agencywide Documents Access and Management System (ADAMS) document accession numbers to the documents referenced in Condition 13 of the amended license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

D. M. Cataldo
