Subject: "Reply to a Notice of Nonconformance"

Reference: NRC Inspection Report No. 99901431/2016-201
Notice of Nonconformance 99901431/2016-201-01

Dear Sir,

Pentair Valves & Controls acknowledges receipt of the above referenced Inspection Report and the resulting Notice of Nonconformance 99901431/2016-201-01. Based on the review conducted of the previous findings from the 2013 NRC Inspection Report No. 99901431/2013-201, it was discovered that three of the Pentair Corrective Action Requests, CAR 665, 666 and 709, were found to have been closed out prematurely without all components of the Planned Corrective Action being addressed.

Please note that we have initiated new Corrective Action Request CAR No. 1017 in response to the above referenced Notice of Nonconformance 99901431/2016-201-01 and have reopened the original three Corrective Action Requests noted above. Pentair is currently working on corrective measures concerning the three previous nonconformances and is also in the process of reviewing all internal Corrective Action Requests generated for 10CFR50 Appendix B related work dating back to the 2013 timeframe.

Pentair recognizes that the formal response to the Notice of Nonconformance was due by January 7, 2017. The purpose of this letter is to request an extension for our response by the close of business on February 3, 2017. Due to the volume of Corrective Action Requests under investigation, additional time is needed to determine true extent of condition.

If you should have any questions please feel free to contact me at (508) 594-4450 or by email:
lynn.skarin@pentair.com

Regards,

Lynn A. Skarin
