NUCLEAR REGULATORY COMMISSION**  
REGION I  
2100 RENAISSANCE BLVD.  
KING OF PRUSSIA, PA 19406-2713

January 18, 2017

Julia K. Guynn, General Counsel  
Cardno, Inc.  
534 Industrial Park Road  
Bluefield, Virginia 24605-0848

SUBJECT: CARDNO, INC., CONSENT TO TRANSFER LICENSE, MAIL CONTROL NO.  
592401

Dear Ms. Guynn:

By the letter dated November 9, 2016, Cardno, Inc. requested written consent by the U.S. Nuclear Regulatory Commission (NRC) to a proposed direct transfer of control of the license to Marshall Miller & Associates, Inc. From your letter, we understand that this transfer will change the licensee name but will not result in any change to location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility.

We understand that the licensee name will change to Marshall Miller & Associates because of the stock purchase from Cardno, Inc. of materials and facilities associated with your mining business.

Based on the above understandings, as more fully detailed in the enclosed NRC staff's Safety Evaluation Report, which documents the NRC staff's safety review of the request, the NRC consents to the proposed transfer. Please note that you will need to notify us promptly, in writing, after the transaction has been finalized and include a signed copy of the sale agreement confirming completion of the transactions. With this information, we can issue an administrative amendment to your NRC license that changes the name of the licensee to reflect the transaction. Please notify the NRC in writing, if this planned sale has not been consummated within 30 days of the date of this letter, or this consent will be deemed null and void. If you have any questions regarding this letter, please contact Dennis Lawyer at 610-337-5366 or via electronic mail at [dennis.lawyer@nrc.gov](mailto:dennis.lawyer@nrc.gov).

Based on the above understandings, the NRC consents to the proposed direct transfer of control of NRC Materials License No. 45-17195-01. Future changes in the licensee's name, licensed use, licensed materials, licensed location, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

J. Guynn
