

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

JAN 26 2017

David W. Lutkenhoff, M.S., CIH, CIEC
Radiation Safety Officer
Van Andel Research Institute
333 Bostwick Avenue, NE
Grand Rapids, MI 49503

Dear Mr. Lutkenhoff:

Enclosed is Amendment No. 07 to your NRC Material License No. 21-32841-01 in accordance with your request. Please note that, based on the new licensing process your license format and the following have been updated. License Conditions 16, 17, 18 and 19 related to the use of sealed sources were deleted because they were not applicable to your program after the removal of licensed materials listed in Subitems 6.S. through 6.U. License Condition 20 regarding the transportation requirement was deleted because the requirement is already specified in the regulations. License Condition 13 regarding the restriction in the use of licensed material and License Condition 21 regarding the authorization for decay in storage were updated to the current standard condition.

For your information, we have received the amendment request dated January 11, 2017. The request is being reviewed.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to

develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
