**SUSQUEHANNA STEAM ELECTRIC STATION
10 CFR 72.48 SUMMARY REPORT OF CHANGES, TESTS
AND EXPERIMENTS
PLA-7571**

Docket No. 72-28

References: 1. PPL Letter (PLA-5283), "Susquehanna Steam Electric Station Implementation of Revised 10 CFR 50.59 and 10 CFR 72.48," dated March 22, 2001.

Pursuant to 10 CFR 72.48(d)(2) a report containing a brief description of any changes, tests and experiments, including a summary of each, is to be submitted to the NRC at intervals not to exceed 24 months. During program reviews, Susquehanna Steam Electric Station (SSES) discovered that a 10 CFR 72.48(d)(2) Biennial Report has not been submitted for the SSES Independent Spent Fuel Storage Installation (ISFSI). As stated in Reference 1, SSES operates a Dry Fuel Storage facility as a General Licensee and does not make changes or conduct tests or experiments that require 10 CFR 72.48 Evaluations.

This letter is provided to report that Susquehanna Steam Electric Station has not completed any changes, tests or experiments requiring 10 CFR 72.48 Evaluation for the reporting period between July 1, 2001 and August 31, 2016.

There are no new or revised regulatory commitments contained in this letter.

Should you have any questions regarding this submittal, please contact Mr. Jason Jennings, Manager – Nuclear Regulatory Affairs at (570) 542-3155.

Sincerely,

R. J. Franssen
