RE: Amendment Request for CoC number USA/9296/B(U)-96

Dear Mr. Ruffin:

QSA Global, Inc. is requesting amendment of the Type B CoC to update the descriptive drawings and the safety analysis report (SAR) referenced under the certificate of compliance. These updates are being made to allow for the use of a third version of an optional jacket for these packages.

With this amendment, we also request a correction/clarification to Section 5(a)(2) of the certificate of conformance. The current description does not match the approved drawings for the package, since based on the package designation, the jackets can be attached either by rivets (Drawings R88000 and R880SC) or by screws (Drawing R88095). We request that the package description in this section be updated to reflect use of either rivets or screws to match the approved configurations on the reference drawings.

The drawing revisions and affected documents associated with these changes are included as enclosures to this letter. Should you have any additional questions, or wish to discuss this amendment request, please contact me.

Sincerely,

e-Signed by Lori Podolak
