

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

February 2, 2017

MEMORANDUM TO: Brian E. Thomas, Director
Division of Engineering
Office of Nuclear Regulatory Research

FROM: Thomas H. Boyce, Chief */RA/*
Regulatory Guidance and Generic Issues Branch
Division of Engineering
Office of Nuclear Regulatory Research

SUBJECT: SUMMARY OF JANUARY 25, 2017, PUBLIC MEETING TO DISCUSS
DRAFT REGULATORY GUIDE (DG-1327), "PWR CONTROL ROD
EJECTION AND BWR CONTROL ROD DROP ACCIDENTS"

On January 25, 2017, the U.S. Nuclear Regulatory Commission (NRC) held a public meeting at the NRC Headquarters with industry and members of the public to discuss DG-1327. The purpose of the meeting was to discuss the draft regulatory guidance related to Control Rod Ejection and Rod Drop Accidents in the draft guide.

The meeting began with introductions of NRC staff in the room and the people who called into the meeting. Industry then provided their perspectives on the guide. In particular, Thomas Eichenberg of the Tennessee Valley Authority and Gregg Swindlehurst of G.S. Nuclear Consulting, LLC, which represented the Electric Power Research Institute's (EPRI) Fuel Reliability Program, gave a presentation with their questions and concerns. The presentation focused on four areas of the draft guide which were: (1) methods and assumptions, (2) failure thresholds, (3) release fractions, and (4) miscellaneous. The presentation from EPRI is available at ML17032A343. At the end of the presentation, the public was able to provide comments in regards to the DG.

The staff noted that the public comment period for DG-1327 was extended until April 21, 2017. At the close of the comment period, the NRC staff will only address the comments received through regulations.gov.
