Gentlemen:

In order that we may continue our review of your application for a license to construct the Nine Mile Point Nuclear Station Unit 2, additional information set forth in the enclosure is needed in those matters concerning Section 13 of the Preliminary Safety Analysis Report, "Conduct of Operations".

In order to maintain our licensing review schedule, we will need a completely adequate response to all of the enclosed questions by November 15, 1972. Please inform us within 7 days after receipt of this letter of your confirmation of the schedule date or the date you will be able to meet. If you cannot meet our specified date or if your reply is not fully responsive to our requests it is highly likely that the overall schedule for completing the licensing review for this project will have to be extended. Since reassignment of the staff's efforts will require completion of the new assignment prior to returning to this project, the extent of the extension will most likely be greater than the extent of delay in your response.

Please contact us if you have any questions regarding the information requested herein.

Sincerely,

Original signed by:  
Roger S. Boyd

Roger S. Boyd, Assistant Director  
for Boiling Water Reactors  
Directorate of Licensing
