Docket Nos. 50-220 (Unit 1)
and 50-410 (Unit 2)

MAY 5 1972

Niagara Mohawk Power Corporation
ATTN: Mr. Thomas J. Brosnan
Vice President and Chief Engineer
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

In an effort to be more responsive to the needs of the public, the Commission has established a document room at the Oswego City Library, 120 East Second Street, Oswego, New York 13126, which contains information relating to your applications for Units 1 and 2 of the Nine Mile Point Nuclear Station.

We will provide the following non-proprietary types of documents relating to these nuclear facilities for this document room: your applications and amendments and changes thereto; Commission actions thereon; requests for additional information; your environmental reports and supplements thereto; AEC Draft and Final Environmental Statements and comments thereon; AEC Safety Evaluations; Reports of the Advisory Committee on Reactor Safeguards; operating, special and incident reports filed by you; and all related Federal Register notices. It also will receive copies of any advice rendered by the Attorney General and items relating to any public hearing that might be held in connection with these facilities.

For Nine Mile Unit No. 1, the above document room will not be complete in that we only have provided copies of Construction Permit No. CPPR-16 and Provisional Operating License No. DPR-17 issued by the Commission and all amendments, changes and orders related thereto. We have not provided copies of your initial application and amendments thereto for Unit 1 that were filed prior to January 1972. Beginning with January 1972, and henceforth, it has been and will continue to be provided with all of the types of items described in paragraph 2 above.

Though we have provided instructions (copy enclosed) to the librarians in charge of this public document room, we believe that further assistance and guidance would be useful to them and we request that you have

one of your representatives make periodic checks of the materials available. In particular, your representative should assure that all revised and supplemental information is properly incorporated in the applications and safety analysis reports, and that any other amendments, reports, and letters which you file with us are available. It is not necessary that you actually supply these documents as we will forward them to this document room. However, if you should encounter situations where documents of the type described above are missing, please provide them if you have them available. If not, please telephone our central files (301-973-7333) and advise them so that the missing information can be provided.

Your cooperation in this matter will be appreciated.

Sincerely,

Donald J. Skovholt
 Assistant Director for
 Operating Reactors
 Directorate of Licensing
