Re: Niagara Mohawk Power Corporation
Nine Mile Point Unit 2
AEC Docket No. 50-410

Dear Mr. O'Leary:

As counsel for the Applicant in the above-captioned case, we hereby transmit three (3) originals and twenty-five (25) copies of Amendment No. 8 to Niagara Mohawk's Application for Licenses. This amendment transmits Supplement No. 8 to the Preliminary Safety Analysis Report filed with the application. Seventy (70) copies of the technical material are attached.

As shown by the attached certificate of service, copies of this pleading and the supplement have been served upon the proper local officials, members and alternates of the Atomic Safety and Licensing Board and the parties in this proceeding.

Very truly yours,

LEBOEUF, LAMB, LEIBY & MACRAE

Docket No. 50-410

AMENDMENT NO. 8
TO
APPLICATION FOR LICENSES

On June 15, 1972, Niagara Mohawk Power Corporation, the Applicant in the above-captioned proceeding, filed its Application for Licenses in the above-captioned docket. The Staff of the United States Atomic Energy Commission, by letter of December 27, 1972, requested certain analyses of the consequences of postulated pipe failures outside the containment.

To furnish the information requested, the Applicant hereby files Amendment No. 8 to the Application for Licenses transmitting Supplement No. 8 to its Preliminary Safety Analysis Report.

WHEREFORE, Applicant prays as in its Application for Licenses, as amended.

Respectfully submitted,
NIAGARA MOHAWK POWER CORPORATION

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary research techniques. The primary data was collected through direct observation and interviews with key stakeholders. Secondary data was obtained from existing reports and databases.

The third section details the results of the data analysis. It shows a clear trend of increasing activity over the period studied. This is supported by statistical evidence and visual representations of the data. The findings suggest that the current strategy is effective, but there are areas for improvement.

Finally, the document concludes with a series of recommendations based on the findings. These include implementing more robust data collection procedures and regularly reviewing the data to identify any changes in the underlying trends. The author believes that these steps will lead to more informed decision-making and better overall performance.

The data shows a significant increase in the number of transactions over the last quarter. This is primarily due to the implementation of the new marketing campaign. The results are promising and indicate that the campaign is resonating with the target audience.
