DOCKET NO: 50-220

LICENSEE: NIAGARA MOHAWK POWER CORPORATION

FACILITY: NINE MILE POINT UNIT 1

SUMMARY OF MEETING WITH NIAGARA MOHAWK REGARDING QA PROGRAM FOR OPERATIONS AT NINE MILE POINT UNIT 1

A meeting was held on December 19, 1973, in Bethesda, Maryland, with representatives of Niagara Mohawk Power Corporation to discuss the Quality Assurance (QA) Program for Operations being implemented at Nine Mile Point Unit 1 (NMP-1). A list of attendees is enclosed.

The meeting discussions centered on Niagara Mohawk's QA response submitted on November 16, 1973, to our requests dated May 21 and July 26, 1973. It was pointed out that the descriptive information provided by this document was too brief for us to determine the adequacy of the QA Program. For example, as regards the QA organization, it is necessary to provide additional description and definition to clearly show how the QA function is independent of line function. Also, a more complete discussion of how each criterion of Appendix B of 10 CFR Part 50 will be satisfied is necessary. Guidance for the scope of what should be included by Niagara Mohawk was given by reference to the three documents, (1) "Guidance on Quality Assurance Requirements During the Operations Phase of Nuclear Power Plants", dated October 26, 1973, (2) "Guidance on Quality Assurance Requirements During Design and Procurement Phase of Nuclear Power Plants", dated June 7, 1973, and (3) applicable portions, as these pertain to the operations phase, of "Guidance for Submittal of Quality Assurance Program Description, Section 17 of PSAR", draft dated October 3, 1973.

Within this frame of references, the licensee's response to our questions was discussed and the additional information necessary to be submitted was identified. The licensee indicated that a schedule for such a

submittal would be developed in January 1974. We indicated that an acceptable program should be submitted no later than March 15, 1974, to avoid delaying our review of the licensee's current application for conversion of the provisional operating license to full-term license.
