

NOV 20 1974

DOCKET NO.: 50-220

LICENSEE: NIAGARA MOHAWK POWER CORPORATION

FACILITY: NINE MILE POINT NUCLEAR STATION UNIT 1 (NMP-1)

SUMMARY OF MEETING AND VISIT WITH LICENSEE AT NINE MILE POINT UNIT 1 SITE

On November 15, 1974, I visited the Nine Mile Point site to become acquainted with the Unit 1 facility and to discuss the current revisions to the Technical Specifications. The licensee was represented by Messrs. P. A. Burt, C. V. Mangan, M. G. Mosier, and C. L. Stuart during the visit and discussion.

Prior to a tour of the NMP-1 facility, a meeting was held to discuss certain changes to the Technical Specifications associated with the issuance of the full-term operating license. The main changes discussed concerned the updating of in-service inspection requirements and revisions to the Administrative Control section of the Technical Specifications. The in-service inspection requirements are being updated to the current edition of the code and the Administration Control section is being revised to conform with our standard tech spec in this area.

Following this discussion, a tour of the Nine Mile Point Unit 1 facility was made. Of particular interest were the plant modifications, presently in progress, being made for augmenting the radwaste systems to meet the "as low as practical" requirements.

Following this tour, a short visit was made to the James A. Fitzpatrick Nuclear Power Plant, which was in the process of initial loading and criticality.
