Washington, D. C. 20545

Dear Mr. Muntzing:

Re: Niagara Mohawk Power Corporation  
AEC Docket No. 50-410

In view of the uncertainties attendant upon the divided decision of the licensing board, one of the few in the history of Atomic Energy Commission licensing activities, and the prospective action upon exceptions to be filed by various of the parties to the proceeding, we do not now deem it prudent to proceed with actual construction. Accordingly, we advise you and all parties that we will not begin construction of Nine Mile Point Unit 2 until after determination by the Appeals Board. Since that decision may not be forthcoming until late 1974, it will likely be economically desirable to defer commencement of actual construction to early 1975.

As soon as a start of construction date has been stabilized, and we are assured that the license decision is beyond reversal on appeal, we will apply in due course for a change in the latest completion date specified in the construction permit.

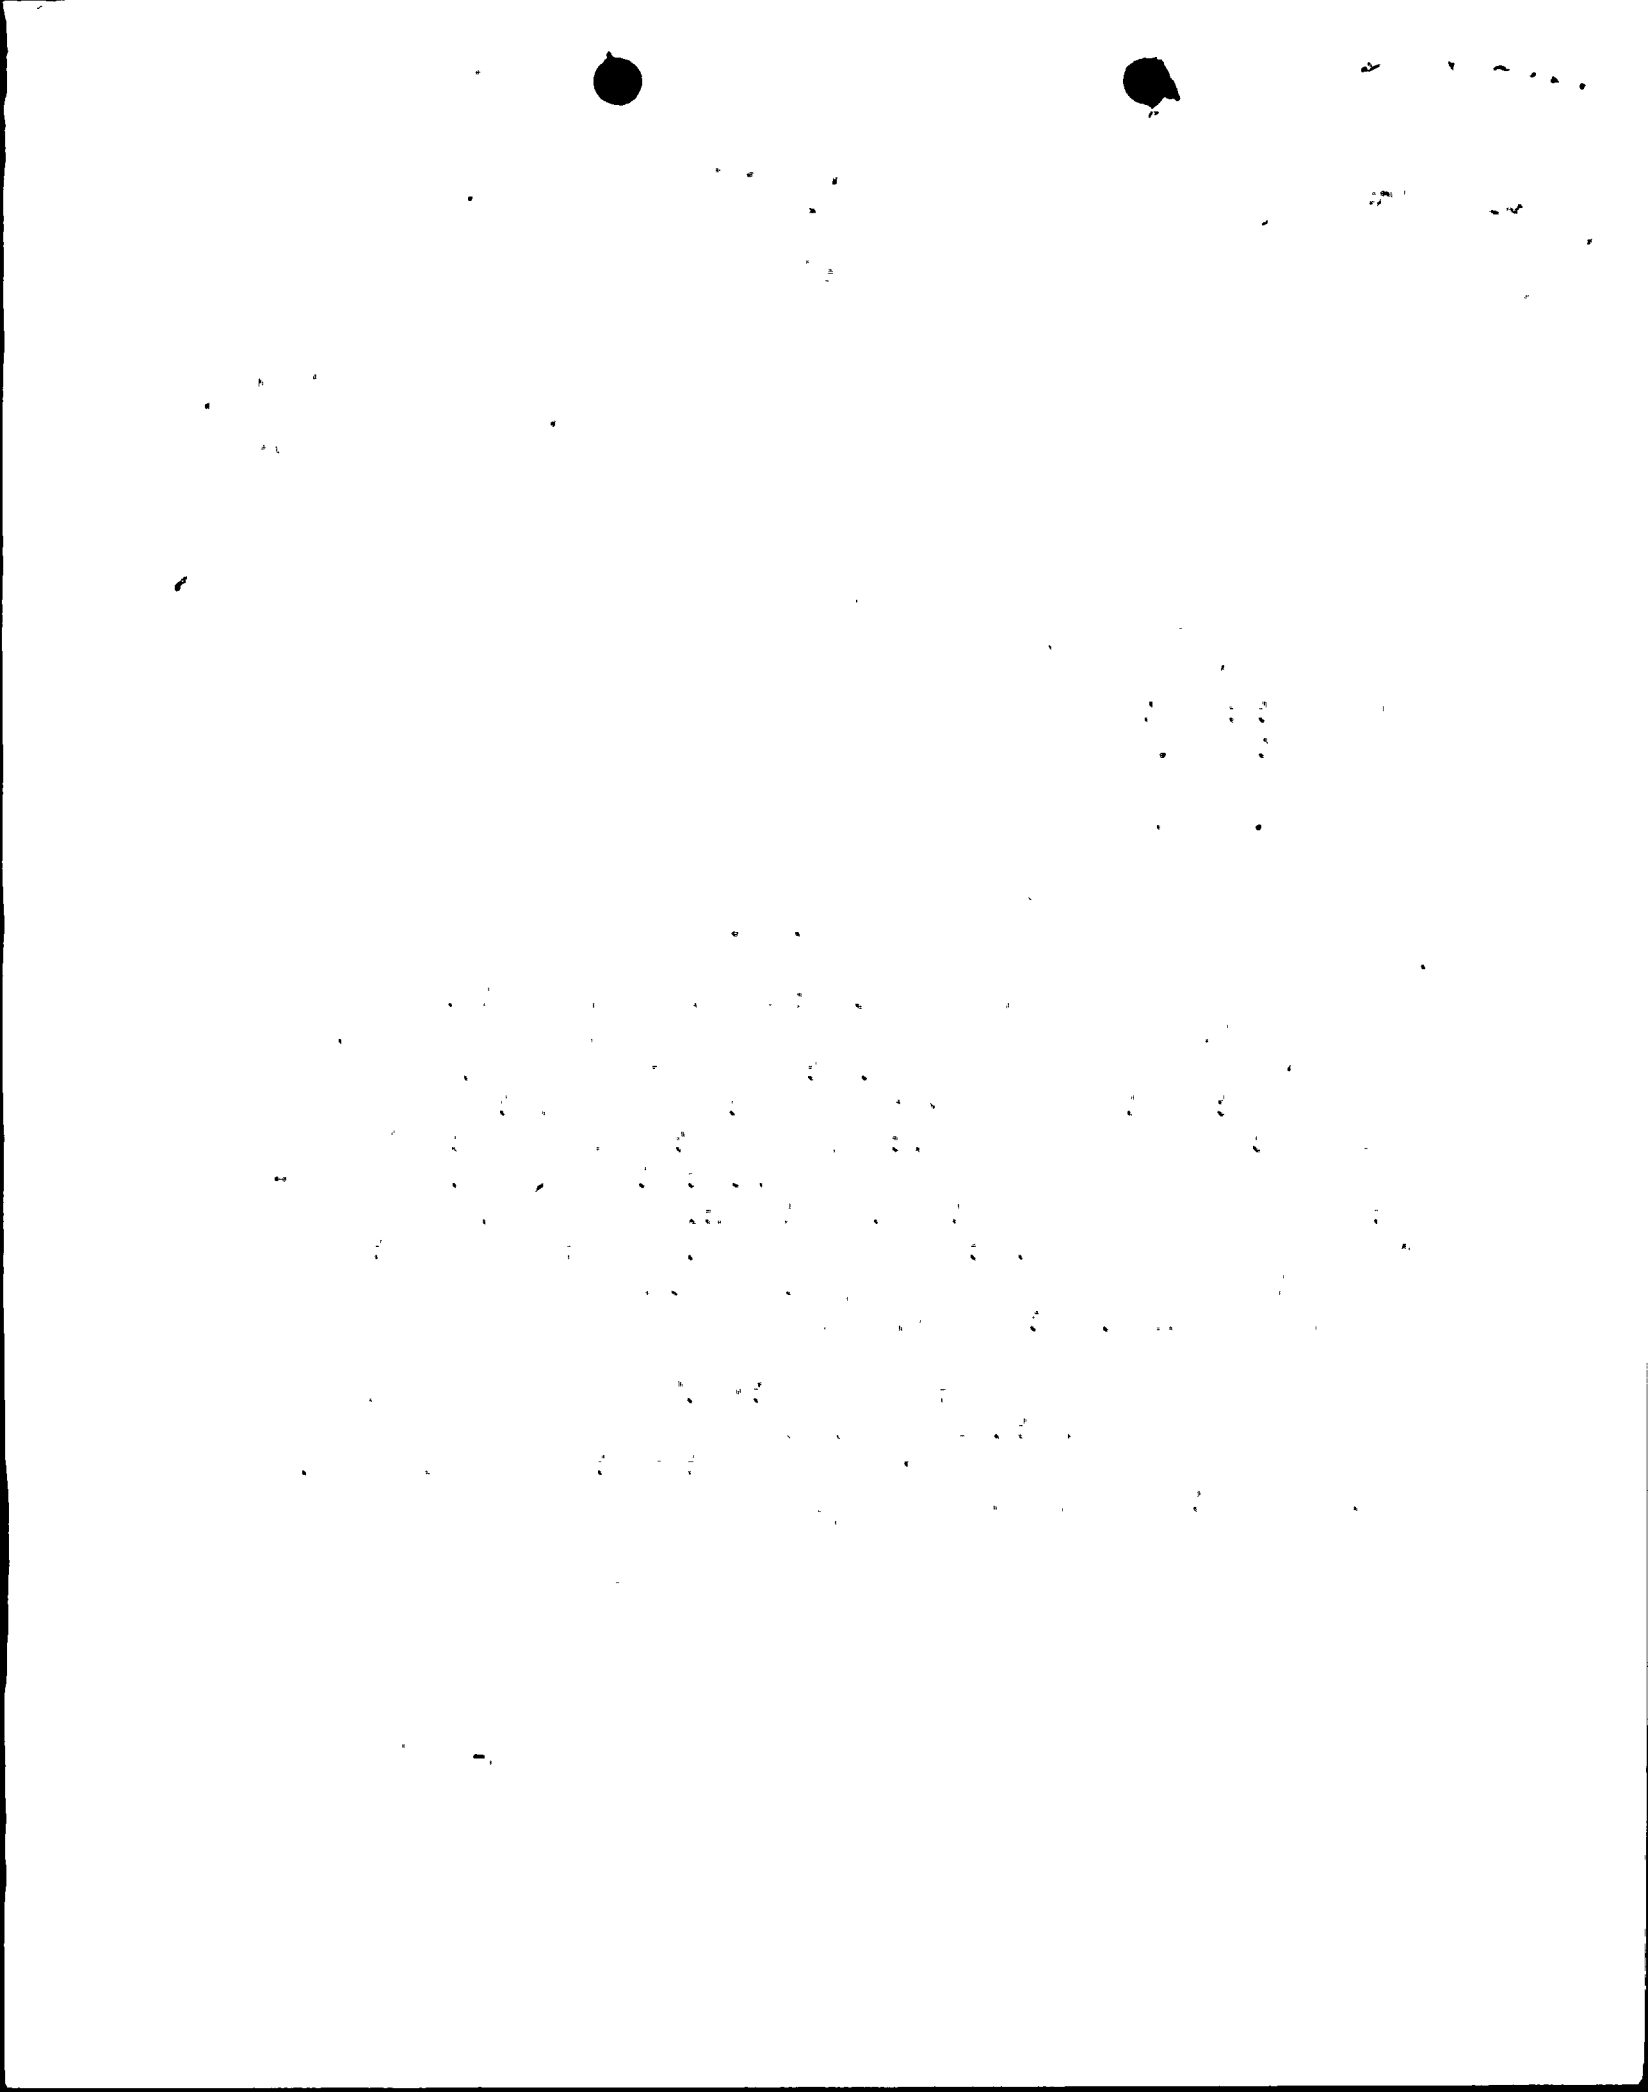

Very truly yours,

A handwritten signature in cursive script that reads "Philip D. Raymond".
