Washington, D. C. 20545

In the Matter of Niagara Mohawk Power Corporation  
(Nine Mile Point, Unit. No. 2)  
Docket No. 50-410

Gentlemen:

With a cover letter from me dated November 26, 1973, you should have received as Intervenor's Exhibit 8 a document entitled: "Fuel Densification Effects on General Electric Boiling Water Reactor Fuel," NEDM-10735, issued by the General Electric Company in August, 1973. It has come to my attention that some of those to whom copies were sent received a different document entitled "Technical Report on Densification of GE Reactor Fuels," issued by the AEC Regulatory Staff and dated August 23, 1973. I am assuming that the wrong document was dispatched to every recipient.

The document specified in the letter of November 26, 1973 is forwarded to you herewith in the appropriate number of copies.

Sincerely,

Jerome S. Cohen  
Counsel for AEC Regulatory Staff

Enclosure: Exhibit 8
