RE: NRC License #21-00943-03 – Amendment

To Whom It May Concern:

We have been notified by the vendor for our high dose rate (HDR) remote afterloader, Elekta, Inc., that the source suppliers on our recently approved Nuclear Regulatory Commission (NRC) license are not current or accurate. As suggested by Elekta, Inc., we request to amend Condition 7H to reflect Sealed Sources (Nucletron Model 105.002 supplied by Elekta, Inc.) manufactured by Alpha-Omega Services, Inc. or Mallinckrodt Medical B.V. This removes source suppliers QSA Global and AEA Technology.

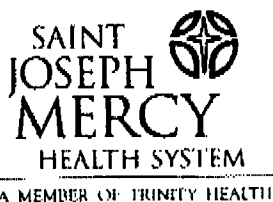

We request your prompt attention to this so that we can obtain a replacement source in March. If you should have any questions or require further information, please contact Ralph P. Lieto, Radiation Safety Officer, at the telephone number above or ralph.lieto@stjoeshealth.org.

Sincerely,

Ralph P. Lieto, MSE
Radiation Safety Officer
