Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Regulatory Docket File

Dear Mr. Lear:

Attached are three copies of a document entitled, "Nine Mile Point Nuclear Station Unit 1, Docket 50-220, Compliance with 10 CFR 50 Appendix I". This represents the first phase of our submittal on the subject. The remainder of the information will be provided by October 1, 1976, in accordance with our March 25, 1976 letter to the Commission.

Your May 7, 1976 letter transmitted model Technical Specifications for maintaining the release of radioactive materials in effluents to as low as reasonably achievable. The Environmental Technical Specifications for Nine Mile Point Unit 1 were developed to comply with the more restrictive "proposed" Appendix I, which preceded the current version. These limits will be effective as of June 30, 1976. Amendments will be forthcoming, however, to bring our Environmental Technical Specifications into conformance with the existing Appendix I by October 1, 1976.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

GERALD K. RHODE
Vice President - Engineering
