Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Lear:

Your April 7, 1976 letter requested additional information regarding our February 4, 1976 license amendment application for Nine Mile Point Unit 1. The attached responses address the questions contained in that letter.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

GERALD K. RHODE
Vice President - Engineering

RESPONSES TO APRIL 7, 1976 NRC QUESTIONS

Nine Mile Point Unit 1

Docket No. 50-220

DPR-63

Request A

In Section II of Attachment "C" to your application, you have indicated that large calibration sources in excess of 100 millicuries are located in shielded wells in the Instrument Calibration Room. Provide a description of the administrative and/or physical controls which limit access to the shielded wells.

Response A

The Instrument Calibration Room is posted as a High Radiation area, and contains a locked door to preclude unauthorized entry. In addition, a Radiation Work Permit is required for entry to the room. This ensures that proper protective clothing and survey requirements are imposed prior to entry. Also, Site Radiation Protection Procedures cover entry into High Radiation areas.

20 2

1-1-1

Request B

In Section II.B.2 of Attachment "C", you have indicated that a remote source handling device will be used to position the Co⁶⁰ source in its storage well for calibration of portable beta-gamma dose rate instruments. Provide a description of the technique, device, or procedure which you will use to assure that, after use, the Co⁶⁰ source will be returned to a position in the well that will result in the minimum radiation exposure to personnel at the well surface.

Response B

Radiation Protection Technical and Analytical Procedure No. S-RTP-14 covers the use of the source and well and requires that the source be returned to the bottom of the well after use which will result in the minimum radiation exposure to personnel at the well surface. In addition, an indicator light denotes whether the source has been returned to the bottom of the well.
