Director of Nuclear Reactor Regulation  
Attn: Mr. George Lear, Chief  
Branch #3  
United States Nuclear Regulatory Commission  
Washington, D. C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Dear Mr. Lear:

This letter is in response to your February 17, 1976 request for information concerning Appendix I of 10 CFR 50. In order to meet the requirements of 10 CFR 50.34a, we plan to submit sufficient information for an evaluation of the means employed for keeping levels of radioactivity in effluents to unrestricted areas as low as practicable. Because of the volume of work involved in supplying this information, we plan to submit it in two phases. That portion which has been completed by June 4, 1976 will be submitted on that date. The remainder will be submitted by October 1, 1976.

We also plan to submit revised Technical Specifications. However, these revisions will be deferred pending further guidance from you as stated in your letter.

We will be available at your convenience to meet with you to discuss the submittal of data and methods of evaluation as requested by your letter.

Very truly yours,

  
Gerald K. Rhode  
Vice President - Engineering
