

FEB 19 1974

Gentlemen:

With the high general interest in energy resources and our particular interest in the performance of nuclear power plants, operating status information in summary form and on a prompt basis is necessary. We currently receive from you on a semiannual basis, information concerning plant and component operability and availability. We now request that this information, plus certain other information which will enable us to better evaluate nuclear power plant performance, be submitted to us on a calendar month basis. The information we desire and examples of reporting formats are provided in Enclosure A to this letter. Enclosure B contains instructions for preparing the formats. Enclosure C includes procedures for submitting the data. For your initial report, please furnish the information for January 1974 as soon as possible -- no later than March 1, 1974. Subsequent reports are due on the 10th of each month.

You may consider the submittal of information on a monthly basis to fulfill the need for that particular information previously submitted on a semiannual basis. The corresponding items of information are described in Sections C.1.a(3)(b) and (c) of Regulatory Guide 1.16. This, of course, does not change the license requirements for semiannual submittal of other or more detailed information, guidance for the content of which is given in other portions of Regulatory Guide 1.16. In particular, the semiannual report should continue to provide more detail concerning causes and corrective actions associated with each shutdown than will be available from the coded information reported on the monthly list.

Monthly Operations Reports
FF:pi. [Signature]

The information you provide, together with information on the AEC inspection status of nuclear power plants, will be published on a monthly basis. This same information will be presented for all nuclear power plants having operating licenses. You will be provided routinely with a copy of this publication. This request has been coordinated with the Federal Energy Office. The information will be available to the public.

I appreciate your cooperation in this important matter.

Sincerely,

L. Manning Muntzing
Director of Regulation
