Docket No: 50-410

Niagara Mohawk Power Corporation  
ATTN: Mr. Gerald K. Rhode  
Vice President - Engineering  
300 Erie Boulevard West  
Syracuse, New York 13202

Gentlemen:

**FIRE PROTECTION EVALUATION - NINE MILE POINT NUCLEAR STATION, UNIT 2**

By letter dated September 30, 1976, we requested that you submit proposed Technical Specifications on fire protection for Nine Mile Point Nuclear Station, Unit 2. The enclosed sample Technical Specifications are intended to provide guidance in the scope and types of such specifications. The enclosure uses the Standard Technical Specification format and may require some adaptation to conform with the format of your Technical Specifications. Blanks or parentheses appear where the information is plant specific. These sample Technical Specifications are not intended to alter the NRC positions given in Appendix A to Branch Technical Position 9.5-1 which has been previously sent to you. The essential part of this guidance is to indicate the scope of material to be included in the Technical Specifications for your facility in the areas of equipment and administrative requirements, and the actions that we would find appropriate if a limiting condition for operation could not be met.

We are also enclosing an Errata Sheet for Appendix A to Branch Technical Position APCSB 9.5-1, "Guidance for Fire Protection for Nuclear Power Plants."

Sincerely,

Original signed by:

S. A. Varga, Chief  
Light Water Reactors Branch No. 4  
Division of Project Management

**Enclosure:**

1. Sample Technical Specifications dated November 3, 1976
2. Errata Sheet
