Branch 2-1  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Re: Nine Mile Point Unit 2  
Docket No. 50-410

Dear Mr. Stolz:

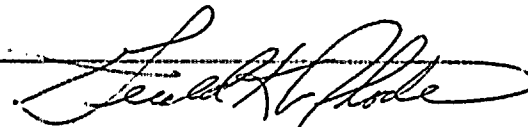

Your letters of April 18 and 21, 1975 requested information on containment hydrodynamic loads and safety relief valve blowdown phenomena for Nine Mile Point Unit 2. Enclosed are three copies of a report entitled, "Plant Design Assessment for Safety Relief Valve and Loss of Coolant Accident Loads." This report substantiates that the Unit 2 containment can withstand simultaneous loss of coolant accident and safety relief valve loads.

Sections 1.5, 4.3, 7.0 and 10.2 describe additional analyses which are continuing. The results of these analyses will be reported in supplements to this report.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

  
GERALD K. RHODE  
Vice President - Engineering
