Mr. George Lear, Chief
Operating Reactors Branch #3
Division of Reactor Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220

Dear Mr. Lear:

Your letter of May 30, 1975, requested information concerning the method of calculation for the new void coefficients in our forthcoming GETAB/GEXL submittal.

This is to advise you that the void coefficient used in the transient analysis associated with the GETAB/GEXL submittal for Nine Mile Point Unit 1 will be calculated based on General Electric's new neutron effective void methods. Conservative design factors applied to void coefficients used in the past will also be applied in the same manner to coefficients calculated with this new method.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Gerald K. Rhode
Vice President-Engineering
