Mr. Donald J. Skovholt
 Assistant Director for Reactor Operations
 Division of Reactor Licensing
 United States Atomic Energy Commission
 Washington, D. C. 20545

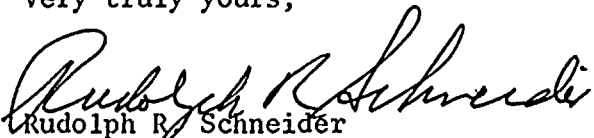

Re: Provisional Operating License: DPR-17
 Docket No.: 50-220

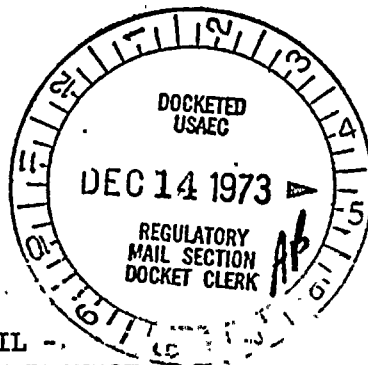

Dear Mr. Skovholt:

Regarding my letter of July 20, 1973 concerning the drywell vacuum breakers at Nine Mile Point Nuclear Station Unit #1 the following information is submitted:

1. Item 1 has been completed. A redundant alarm circuit has been installed and is operational. Both alarm circuits function on .05" or less of disc movement. Thus the two commitments made to assure system operability during the period of time required to install the redundant alarm circuit with the desired accuracy have been completed. Therefore the dial indicators have been removed and the operability test following a suppression chamber transient have been discontinued.
2. The Proposed Technical Specifications indicated in Item 4 of my July 20, 1973 letter are before the Safety Review and Audit Board (SR&AB) and will be submitted for commission review within one month.

Very truly yours,

 Rudolph R. Schneider
 Vice President - Electric Operations
