## NIAGARA MOHAWK POWER CORPORATION

NIAGARA  MOHAWK

300 ERIE BOULEVARD WEST  
SYRACUSE, N. Y. 13202

July 2, 1974

Mr. Dennis L. Ziemann, Chief  
Operating Reactors Branch #2  
Directorate of Licensing  
United States Atomic Energy Commission  
Washington, D. C. 20545

Dear Mr. Ziemann:

Re: Nine Mile Point Unit I  
Docket No. 50-220

The Technical Supplement to Petition for Conversion from Provisional Operating License to Full-Term Operating License indicated that we planned to have a Containment Atmospheric Dilution System operable by 1974. However, it was not feasible to firm up the design of this system until the Commission's review process was completed, which extended well into this year. This letter is to advise that we now plan to have this system operable by the Fall of 1976. In the interim, capability for nitrogen addition and manual venting will be maintained.

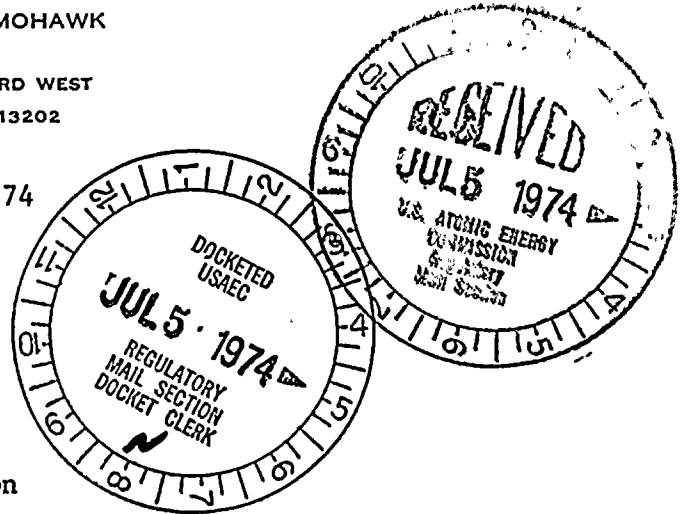

This system and all of its components will be designed to engineered safeguard standards. Further, this system will have the capability to sample individual points in the containment.

Very truly yours,

P. D. Raymond  
Vice President - Engineering
