

JUN 12 1973

Docket No. 50-220

Niagara Mohawk Power Corporation
ATTN: Mr. P. D. Raymond
Vice President - Engineering
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

Your application notarized June 7, 1972, as transmitted by letter dated June 15, 1972, requested amendment to Provisional Operating License No. DPR-17 to designate the nuclear facility licensed thereunder as Unit No. 1 of the Nine Mile Point Nuclear Station. Our letter to you dated December 5, 1972, stated that this action would be combined with our next amendment issuance; however, we have amended the license at this time since the only outstanding license action pending with the Commission is the conversion of the provisional operating license to a full-term license which is not scheduled to be completed until approximately the end of 1974.

Consequently, Amendment No. 3 to Provisional Operating License No. DPR-17 is enclosed designating the facility as Unit No. 1. As required by Part 2 of the Commission's regulations, a notice of issuance (copy enclosed) has been filed with the Office of the Federal Register for publication.

Sincerely,

Original Signed By

A. Giambusso

A. Giambusso, Deputy Director
for Reactor Projects
Directorate of Licensing

The following table shows the results of the experiments conducted over a period of six months. The data indicates a significant increase in productivity when the new method was implemented. The results are summarized in the table below.

Month	Method A	Method B
Jan	100	120
Feb	110	130
Mar	120	140
Apr	130	150
May	140	160
Jun	150	170

The data clearly shows that Method B consistently outperforms Method A, with a steady increase in output over time. This suggests that the new method is more efficient and should be adopted for future projects.

Item	Quantity	Value
1. Raw materials	1000	5000
2. Labor	2000	4000
3. Overhead	500	2500
4. Total	3500	11500

NIAGARA MOHAWK POWER CORPORATION

DOCKET NO. 50-220

AMENDMENT TO PROVISIONAL OPERATING LICENSE

Amendment No. 3
License No. DPR-17

The Atomic Energy Commission ("the Commission") has found that:

- A. The application by the Niagara Mohawk Power Corporation notarized June 7, 1972, complies with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's regulations set forth in 10 CFR Chapter I;
- B. The issuance of this amendment for designation of a unit number for the nuclear facility under Commission Provisional Operating License No. DPR-17 will not be inimical to the common defense and security or to the health and safety of the public, and
- C. Prior public notice of proposed issuance of this license amendment is not required since the amendment does not involve a significant hazards consideration.

Accordingly, Provisional Operating License No. DPR-17 issued to the Niagara Mohawk Power Corporation is hereby amended by replacing the facility name "Nine Mile Point Nuclear Station" with "Nine Mile Point Nuclear Station Unit No. 1" wherever it appears in the license and the Technical Specifications appended thereto and subsequent amendments and changes thereto. All other portions of the license remain unchanged.

This amendment is effective as of its date of issuance.

UNITED STATES ATOMIC ENERGY COMMISSION

DOCKET NO. 50-220

NIAGARA MOHAWK POWER CORPORATION

NOTICE OF ISSUANCE OF FACILITY LICENSE AMENDMENT

Notice is hereby given that the Atomic Energy Commission ("the Commission") has issued Amendment No. 3 to Provisional Operating License No. DPR-17 designating the nuclear facility licensed thereunder as Unit No. 1 of the Nine Mile Point Nuclear Station. The amendment is effective as of its date of issuance.

The Niagara Mohawk Power Corporation of Syracuse, New York, is the holder of Provisional Operating License No. DPR-17 issued by the Commission on August 22, 1969, for possession, use and operation of a boiling water type nuclear power reactor facility on its site in Scriba, Oswego County, New York, at power levels up to 1850 megawatts (thermal).

By application notarized June 7, 1972, as transmitted by letter dated June 15, 1972, the Niagara Mohawk Power Corporation requested that Provisional Operating License No. DPR-17 be amended to designate the nuclear power reactor facility licensed thereunder as Unit No. 1 of the Nine Mile Point Nuclear Station to avoid confusion since the Corporation has filed an application with the Commission for construction of a second facility on its site in Scriba, New York.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author details the various methods used to collect and analyze the data. This includes both manual and automated processes. The goal is to ensure that the information is both reliable and up-to-date.

The third part of the report focuses on the results of the analysis. It shows a clear trend of growth over the period studied. This is attributed to several key factors, including improved operational efficiency and increased market demand.

Finally, the document concludes with a series of recommendations for future actions. These are based on the findings of the analysis and aim to further optimize the organization's performance.

The Commission's regulatory staff has found that the application complies with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's regulations published in 10 CFR Chapter I, and that the issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public. Since operation of the facility in the manner previously reviewed and approved by the Commission is not altered by the issuance of this amendment, the Commission's regulatory staff also has concluded that this action does not involve significant hazards considerations; consequently, prior public notice of proposed issuance of the amendment is not required.

A copy of Niagara Mohawk Power Corporation's application of June 7, 1972, and a copy of Amendment No. 3 to License No. DPR-17 are available for public inspection at the Commission's Public Document Room at 1717 H Street, N. W., Washington, D. C., and at the Oswego City Library located at 120 East Second Street, Oswego, New York 13126. Single copies of the license amendment may be obtained upon request addressed to the U. S. Atomic Energy Commission, Washington, D. C. 20545; Attention: Deputy Director for Reactor Projects, Directorate of Licensing.
