Reference: Amendment Request
NRC Material License No. 24-32630-01

Ms. Bishop,

We are requesting a change of control to our referenced NRC Material License, Amendment 6 dated November 10, 2016. There has not been and will not be any change in the currently approved storage location and surroundings, and use of the licensed nuclear density meters.

Gateway Geotechnical, LLC has been purchased by THD Design Group, Inc., 148 Chesterfield Industrial Boulevard, Suite E, Chesterfield, Missouri 63005, effective February 1, 2017. And, our administrative offices will no longer be located at 17736 Edison Avenue, Chesterfield, Missouri 63005, but will be located at the THD address, which is the same as the storage location for the nuclear density meters. Their storage location, surroundings, and use will remain unchanged.

The change of control is requested as soon as possible. The change of address to 148 Chesterfield Industrial Boulevard, Suite E, Chesterfield, Missouri 63005 is immediate and should be used for all correspondence. Robert L. Sudholt will remain as our Radiation Safety Officer, and no new individuals will be using the meters. Our telephone number and email addresses remain unchanged.

By signature below, both the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the transferee is aware of the associated responsibilities. The transferee further agrees to abide by all constraints, conditions, requirements, representations, and commitments identified in the existing license.

If you need anything further to process this request you may contact either of the undersigned. Thank you very much for your assistance.

Respectfully,
GATEWAY GEOTECHNICAL, LLC

T. Michael McMillen, PE, D.GE
