DOCKET NUMBER 70-143, LICENSE NUMBER SNM-124 (COST

The Office of Nuclear Security and Incident Response has completed its review of revisions 14 and 15 to the Physical Protection Plan submitted by Nuclear Fuel Services, Inc. (NFS) on September 8, 2016 and September 26, 2016.

The methods and procedures outlined in NFS' Physical Protection Plan Revisions 14 and 15, satisfy the performance objectives, systems capabilities, and reporting requirements specified in 10 CFR 73.45, 73.46 and applicable NRC Security Orders. Therefore, NRC staff finds the current NFS Physical Protection Plan, revision 15, is acceptable and provides reasonable assurance that the requirements for the physical protection of Strategic Special Nuclear Materials will be met.

We are basing our conclusions and findings in this Safeguards Evaluation Report (SER) on the information provided by NFS. The portion of the SER addressing the fitness-for-duty aspects of the plan and is attached as Enclosure 1 and the portion of the SER addressing the physical protection aspects of the plan is attached as Enclosure 2.
