REVISION 3, "REALISTIC LARGE BREAK LOCA

(TAC NO. MF2904)

On November 19, 2015, a partially closed pre-submittal meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and AREVA Inc. (AREVA) representatives. The purpose of this meeting was for AREVA and the NRC staff to discuss unresolved issues in the NRC staff review of Topical Report (TR) EMF-2103, Revision 3. The issues needed to be resolved so that the draft safety evaluation (SE) to be completed. The NRC staff and AREVA representatives discussed the revised statistical package, information to be provided to the NRC staff, request for additional information questions, draft limitations and conditions proposed on the TR by the NRC staff, and other items the NRC may need to complete the draft SE.

A list of attendees is enclosed. The AREVA presentation was determined to be proprietary information, therefore, is not available publicly.
