SUBJECT
Additional Information Request Teleconference

SUMMARY
The NRC contacted GEH to determine if GEH intended to provide supplemental information in support of a 71.95 report submitted on October 28, 2016 (ML16302A348). GEH indicated no supplemental information would be submitted, but GEH also stated that they were compiling documentation associated with the 71.95 report for review during the next NRC inspection. GEH stated that, because they needed to make a shipment in June, 2017 using the GE-2000, they intended to amend their letter authorization request submitted on July 25, 2016 (ML16207A197), if necessary, in March, 2017. Consequently, GEH would not be able to respond to the requests for additional information issued by the NRC to GEH (ML16214A043) until either May or June, 2017.
