Subject: [External_Sender] Deny WCS license for nuclear dump.

No license to construct and operate a "centralized interim storage facility" for 40,000 metric tons of commercial irradiated nuclear fuel, more than half of what exists in the U.S.

No Nuclear dumping near aquifers. What if so-called interim storage (for "only" 20-40 years, which is already a long time, in most people's books!) becomes much longer term, or even *de facto* permanent?

What if future replacements for today's U.S. Representatives from these adjacent congressional districts in NM and TX, decide enough is enough, and the high-level radioactive wastes need to move? Those one or two future U.S. Representatives from here, would then face the daunting challenge of overcoming the inertia, or even active opposition, of the other 433-434 Members of the U.S. House of Representatives, who might be just fine with the high-level radioactive wastes staying at WCS forevermore (it's not in *their* congressional district, after all!) – which is how long they remain hazardous by the way.

Thank you

Isis Brenner-Ward
