Bruce,
NuScale concurs with the estimated dates and hours for review. Thank you for the draft acceptance letter.

Subject: Acceptance of TR-0516-49417 for Review and Request for Concurrence on Schedule and Resources

Dear Ms. Wike:

By letters dated July 31, 2016 and December 3, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession Numbers ML16250A851 and ML16340A756, respectively) NuScale submitted for NRC staff review Topical Report TR-0516-49417-P "*Evaluation Methodology for Stability Analysis of the NuScale Power Module*," and the subsequent "Response to NRC Request for Supplemental Information to TR-0516-49417-P, Revision 0."

The NRC staff expects to issue its request for additional information (RAI) questions by October 5, 2017, and issue its advance safety evaluation by June 5, 2018, provided that NuScale is able to address any issues identified during the review process in a timely manner. The NRC staff estimates that the review will require approximately 1850 staff hours including project management. This estimate could change if significant technical issues arise and additional rounds of RAIs are needed to complete the NRC staff's review.

Please provide us with your feedback at your earliest convenience. The NuScale concurrence with the resource and time estimates will be documented in our forthcoming acceptance letter to NuScale.

Best Regards,

Bruce M. Bovol
