Subject: [External_Sender] WCS, TX centralized interim storage

Dear Sir/Madam,

Please oppose West Control Specialists, in West Texas, attempts to open a de facto permanent parking lot dump for up to half the commercial high-level radioactive waste in the U.S., upstream of the Ogallala Aquifer, vital drinking and irrigation water supply for numerous High Plains states, from Texas to South Dakota.

The region around WCS has a high proportion of low income, Latin American residents, and is already heavily burdened with nuclear activities and dirty fossil fuel industries. WCS would launch unprecedented numbers of irradiated nuclear fuel train and barge shipments through many states.

Thank you for your time.

Sincerely,

Ronit Corry
