Gentlemen:

Subject: Inspection 78-14

This refers to the inspection conducted by Mr. J. Kottan of this office on September 25-27, 1978, at Nine Mile Point Nuclear Station, Unit 1 of activities authorized by NRC License No. DPR-63 and to the discussions of our findings held by Mr. Kottan with Mr. T. Perkins and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the Office of Inspection and Enforcement Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was also brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent Inspection Report.

Our inspector also verified the steps you have taken to correct the item of noncompliance brought to your attention in a letter dated November 17, 1977. We have no further questions regarding your action at this time.

Within the scope of this inspection, no items of noncompliance were observed.
