Division of Operating Reactors
Attn: Mr. Thomas A. Ippolito, Chief
Operating Reactors/Branch #3
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Ippolito:

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

As stated in Attachment B of the Application for Amendment to Operating License dated November 20, 1978, additional analysis is provided. This supports a revised end-of-cycle power level profile and verifies applicability of the revised Load Line Limit Analysis. Attached are forty (40) copies of NEDO-24155-1, Supplement 1, which supplements our previous licensing submittal for Reload 7 and contains the results of the aforementioned analyses.

The results of these analyses show that no Technical Specification changes other than those contained in the November 20, 1978 submittal are required. However, these analyses show rated power operation is allowed beyond the previously analyzed point at EOC6-2000 MWD/ST to EOC6-1500 MWD/ST.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise
