Attn: Mr. R. T. Carlson, Chief  
Reactor Construction and Engineering  
Support Branch  
U. S. Nuclear Regulatory Commission  
631 Park Avenue  
King of Prussia, Pennsylvania 19406

Dear Mr. Carlson:

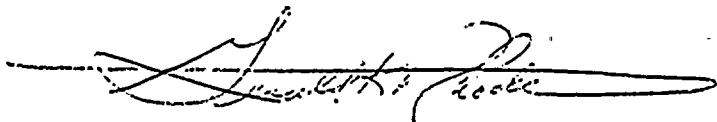

Re: Nine Mile Point Unit 2  
Docket No. 50-410

On September 22, 1978 and December 1, 1978, we notified you in writing of our continuing effort to evaluate weld indications on cadweld sleeves of the Nine Mile Point Unit 2 containment liner knuckle plate. These letters indicated that reports would be provided by December 15, 1978 and December 22, 1978, respectively.

Since the new indications reported on December 1, 1978 expanded the scope of the evaluation, we will require more time to evaluate this information. Therefore, it is now planned that a single report addressing all of the cadweld sleeve weld indications will be provided by February 28, 1978.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

  
Gerald K. Rhode, Vice President  
System Project Management

Xc: Director of Inspection and Enforcement
