Dear Mr. Brunner:

Re: Docket No. 50-220  
Inspection Report 78-11  
(Supplemental Information)

My September 28, 1978 letter provided information relating to the inspection conducted by members of your staff on August 14-18, 1978 at Nine Mile Point Nuclear Station Unit #1. In response to Item A of the subject Inspection Report, it was indicated that a letter revision would be submitted to modify the FSAR Supplement 12 Quality Assurance Program.

Since the FSAR Supplement 12 Quality Assurance Program is currently being updated as a general revision, it is also appropriate to include those changes described in my September 28, 1978 letter. The updated revision will be submitted to the Division of Reactor Regulation by May, 1979, in lieu of a letter revision.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
