

Docket No. 50-220

MARCH 12 1979

Mr. Donald P. Dise
Vice President - Engineering
Niagara Mohawk Power Corporation
300 Erie Boulevard West
Syracuse, New York 13202

Dear Mr. Dise:

By letter dated March 2, 1979 you submitted the draft radiological effluent Technical Specifications for the Nine Mile Point Unit No. 1 Nuclear Plant. In this letter you indicated that the Offsite Dose Calculation Manual (ODCM) will be available at a later date, but did not provide a submittal schedule. In addition, the solid radioactive waste Technical Specification (including the Process Control Program) was deleted and the Administrative Controls Technical Specifications were incomplete.

In order to meet our review schedule, you are requested to provide by April 13, 1979: (1) the ODCM, (2) the waste solidification Technical Specifications, (3) the Process Control Program, and (4) the Administrative Control Technical Specifications.

If we can be of assistance, please advise.

Sincerely,

Original signed by
