Dear Mr. Carlson:

Re: Nine Mile Point Unit 2
Docket No. 50-410

My October 18, 1977 letter to Mr. Grier discussed safety relief valve actuation and loads on the primary containment for Nine Mile Point Unit 2. Niagara Mohawk is working with General Electric, consultants and the Mark II Containment Group to resolve these issues on a generic basis.

Our December 14, 1978 letter to Mr. Denton indicated that safety relief valve actuation and load conditions would be addressed in the Final Safety Analysis Report. This will serve as the report required by 10CFR21 and 10CFR50.55(e).

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Gerald K. Rhode, Vice President
System Project Management
