Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Our letter of October 25, 1978 indicated that results of a stress corrosion analysis on the sensitized stainless steel samples, which were removed from inside the reactor vessel during the Spring 1979 refueling outage, would be available within 90 days following the completion of the outage. Due to delays in obtaining verification of drawings and contamination levels of these samples, the results will be delayed until December 1, 1979.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

D. P. Dise
Vice President - Engineering
