 Philadelphia, Pennsylvania 19149

Dear Mr. Lewis:

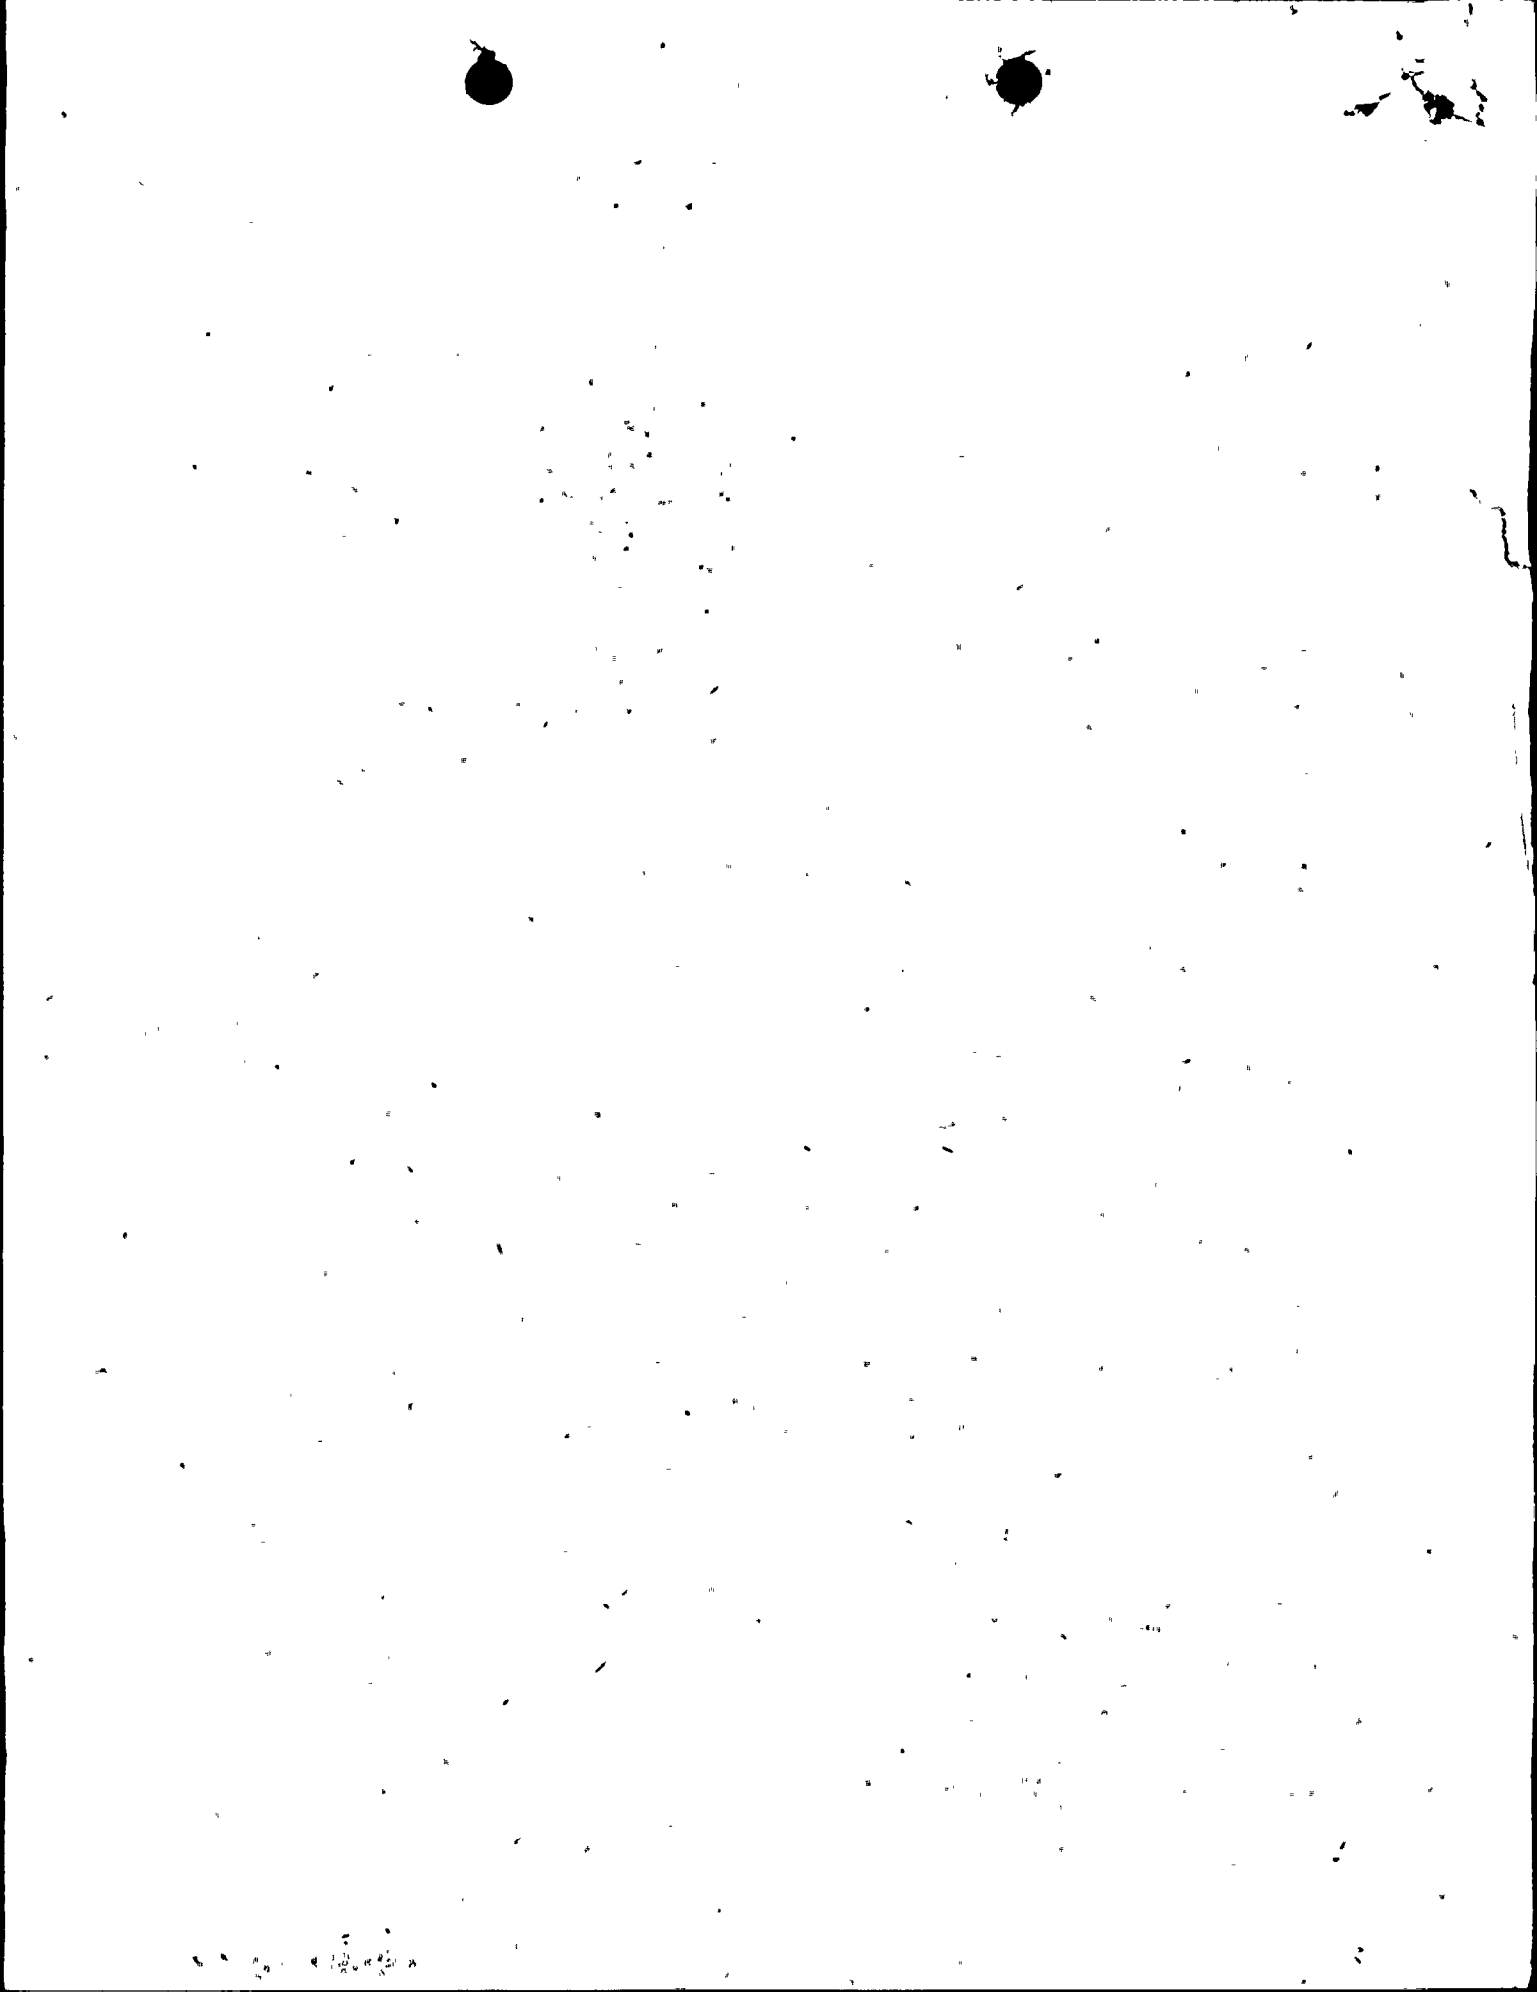

Thank you for your letter of June 17, 1979 wherein you indicated an interest in the Niagara Mohawk Power Corporation's proposed installation of the Newport News Industrial Corporation Radwaste Volume Reduction System. Specifically, you requested a copy of the Newport News Topical Report and the staff's Safety Evaluation. In addition, you requested public input hearings.

Please find enclosed a copy of the Newport News Topical report. For future reference, please be advised that this document is available in the Public Document Rooms. As indicated in our letter to you of February 14, 1979 the Nine Mile Point Unit No. 1 Docket Number is 50-220, DPR-63. With respect to the staff's Safety Evaluation Report, our review is not complete at this time. Upon completion of this review the Safety Evaluation will be written and subsequently made available through the Public Document Room. We will forward a copy of our evaluation when finalized.

Regarding hearings, there will be no hearing pertaining to the Newport News Topical Report. The Safety Evaluation Report which covers this Topical will not approve the installation or use of the proposed technology. The Safety Evaluation Report will be issued once the staff is assured of the generic safety of the system and will approve the Topical Report as containing information which has been determined to be acceptable to the staff for referencing in individual licensing actions. The determination on actual installation or use will be made following the staff's review of the Niagara Mohawk Power Company's request for approval of a Radwaste Volume Reduction System at the Nine Mile Point Nuclear Plant, Unit No. 1. Therefore, if a decision is made to convene a hearing board, it will pertain to the Niagara Mohawk Power Company proposal. As indicated in our February 14, 1979 letter, the determination to convene a board has not been made. If such a board is convened, we will notify you of such, and the board will be notified of your interest.

Docket No. 50-220

Mr. Marvin I. Lewis
6504 Bradford Terrace
Philadelphia, Pennsylvania 19149

Dear Mr. Lewis:

Thank you for your letter of June 17, 1979 wherein you indicated an interest in the Niagara Mohawk Power Corporation's proposed installation of the Newport News Industrial Corporation Radwaste Volume Reduction System. Specifically, you requested a copy of the Newport News Topical Report and the staff's Safety Evaluation. In addition, you requested public input hearings.

Regarding the Topical Report, this document is available in the Public Document Rooms. As indicated in our letter to you of February 14, 1979, the Nine Mile Point Unit No. 1 Docket Number is 50-220, DPR-63. With respect to the staff's Safety Evaluation Report, our review is not complete at this time. Upon completion of this review the Safety Evaluation will be written and subsequently made available through the Public Document Room.

Regarding hearings, there will be no hearing regarding the Newport News Topical Report. The Safety Evaluation Report which covers this Topical will not approve the installation or use of the proposed technology. This determination will be made via the Niagara Mohawk Power Company's request for approval of a Radwaste Volume Reduction System at the Nine Mile Point Nuclear Plant, Unit No. 1. Therefore, if a decision is made to convene a hearing board, it will pertain to the Niagara Mohawk Power Company proposal. As indicated in our February 14, 1979 letter, the determination to convene a board has not been made. If such a board is convened, we will notify you of such, and the board will be notified of your interest.

If we can be of further assistance, please advise.

NRC

Sirs:

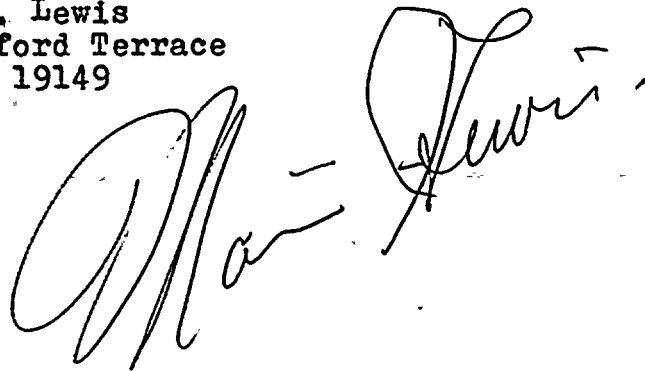

I would like to be entered as a participant in the "Radioactive Waste Reduction System" topicalreport program.

This refers to the safety evaluation being done on the Newport News Industrial Corporation Tenneco Work on the Niagara Mohawk incinerator.

Please send the topicalreport and the Staff's safety evaluation.

I wish to request public input hearings on this incinerator before any experimental work or license is contemplated.

Marvin I. Lewis
