King of Prussia, PA 19406

Dear Mr. Grier:

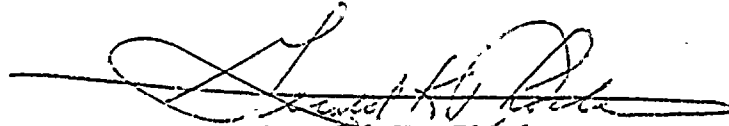

Re: Nine Mile Point Unit 2
Docket No. 50-410

Your July 2, 1979 I. E. Bulletin 79-14 requested information regarding seismic analysis for as-built safety related piping systems at Nine Mile Point Unit 2. Since the Unit 2 project has not installed any safety-related piping systems, those sections of the Bulletin requesting verification of the seismic analysis input with the "as-built" condition of the piping systems are not applicable.

As construction proceeds, all appropriate "as built" information on seismically analyzed safety related piping systems will be recorded and verified in accordance with an "as-built" procedure currently under development. The systems which will be seismically analyzed and the details of the seismic analysis and verification method will be provided in the Final Safety Analysis Report.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Gerald K. Rhode
Vice President
