Re: Nine Mile Point Unit 1
Docket 50-220
DPR-63

Gentlemen:

Your letter of July 6, 1979 requested a proposed amendment to our Technical Specifications. This would require that all core alterations be directly supervised by a Senior Reactor Operator.

A license amendment will be submitted, by January 1981, to incorporate this change in our Technical Specifications. Since the next refueling outage for Nine Mile Point Unit 1 is scheduled for the Spring of 1981, ample time is available to train additional Senior Reactor Operators.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
